

What is Colombia's 4G and 5G Action Plan?

The Plan reflects the Petro administration priority of increasing connectivity throughout the country.

By 2026, the administration's goal is to provide 85% of Colombia's population with meaningful levels of connectivity. 4G and 5G Auction Development Timeline: December 2022: Publication of 5G Auction Plan.

Is 5G a reality in Colombia?

Mauricio Lizcano, Colombia's Minister of Information Technology and Communications, expressed enthusiasm about the development, stating, "Historic! 5G is a reality for Colombians." He further announced that the implementation of 5G services is set to commence in February of the following year.

When will 5G start in Colombia?

He further announced that the implementation of 5G services is set to commence in February of the following year.

Lizcano also shed light on the expected investment trajectory for Colombia's 5G network.

Over the next decade, the nation anticipates an investment of around 28 trillion pesos (close to \$7.11 billion).

Why is the 5G auction important for Colombia?

The successful execution of the 5G auction represents a landmark achievement for Colombia. It brings the country to the forefront of the 5G revolution in Latin America and sets a precedent for future technological advancements.

Who won 5G data services auction in Colombia?

Colombia, stepping boldly into the future of telecommunications, has announced the winners of its much-anticipated fifth-generation (5G) data services auction.

In a competitive bid that drew attention from major players in the telecom industry, Claro, T Elecall Colombia S. A. S., W. O. M., and Union Temporal Colombia Movil-T elefonica emerged victorious.

How many 5G licences have been awarded in Colombia?

No licences have been awarded yet.

According to the Objective Selection Process Plan for the Deployment of 5G Networks in Colombia (available only in Spanish here), a draft version will be made available for public review by the second quarter of 2023.

After this, the 5G licences will be awarded for the 3.5 GHz and 26 GHz spectrum bands.

LHASSA, 17 decembre (Xinhua) -- Plus de 17.000 stations de base 5G ont ete construites dans la region autonome du Xizang, dans le sud-ouest de la Chine, jusqu'a present, dont 7.035 ont ete...
